

Name _____ Date _____ Period _____

The Biggest Places on Earth

The earth has seven continents. Most continents are made up of many countries. The earth also has four main oceans.

Using the map above, answer the following questions. You may use an atlas to help you.

1. Name the continent that goes with each letter.

- | | |
|----------|----------|
| A. _____ | E. _____ |
| B. _____ | F. _____ |
| C. _____ | G. _____ |
| D. _____ | |

2. Draw a red line along the equator and a blue line along the prime meridian.

3. On the map, label the four main oceans in the world.

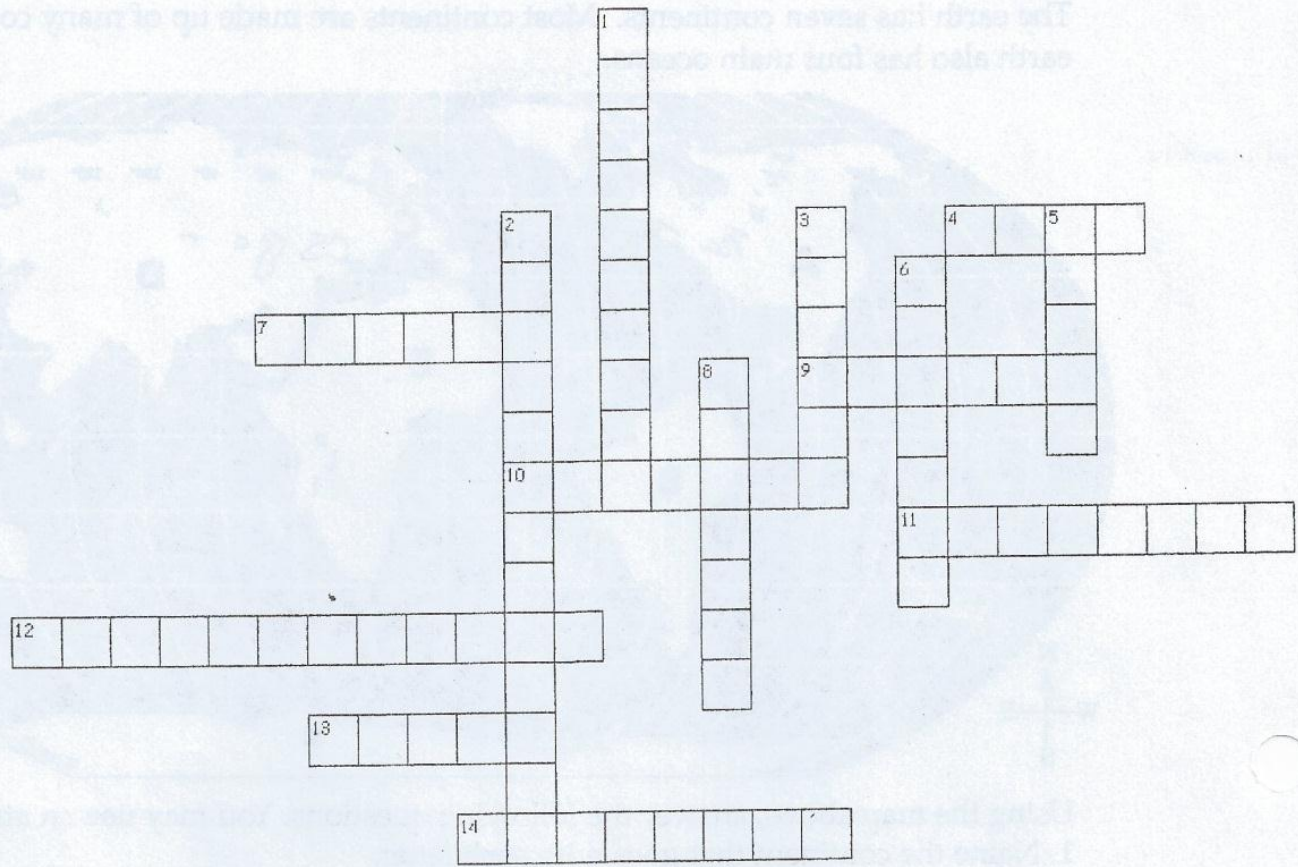

4. To go from Europe to Africa, which direction would you travel? _____

5. Color our continent red. Then color the other continents different colors.

6. Name a country on each continent. (Hint: The coldest continent doesn't have any countries on it.)

- | | |
|----------|----------|
| A. _____ | D. _____ |
| B. _____ | E. _____ |
| C. _____ | F. _____ |
| | G. _____ |

Geography

Across
